SUMMARY

As a driven and curious B.Tech Data Science student, I'm passionate about unlocking insights from complex data sets to drive business growth and improvement. With a strong foundation in computer science and mathematics, I'm well-versed in machine learning, deep learning, and data visualization techniques. I'm proficient in programming languages such as Python, R, and SQL, and I have hands-on experience with popular data science tools like TensorFlow, Keras, and Tableau.

EDUCATION

10th
Shubh Narayan Singh Inter College
📅 03/2016

12th
Shubh Narayan Singh Inter College
📅 03/2018

Bachelor Of Technology
Quantum University(Roorkee)
📅 06/2026

SKILLS

Python   **MYSQL**

Data-Visualization

Basic Data Structure & Algorithms

Power BI

PROJECTS

Predicting Hospitality Readmission
📅 05/2023   📍 Roorkee

It is for the patients, who has been discharge from a hospital is admitted again within a certain period often within 30 days.

- To practice and enhance my software development skills.

Real E-State Prediction Using Machine Learning
📅 03/2024   📍 Location

The purpose of this project is to develop a predictive model for real estate prices using machine learning techniques.

- To practice and enhance my software development skills.

PASSIONS

📖 **Reading Indian Authors Books**

💎 **I also love singing**
